

ES-Backup 3.6 - New Version

• Completely re-designed Backup and Restore Engine

- Based on open UNIX dump format, results in guaranteed data restoration
- Up to 30% higher data transfer during backup and synchronization, results in smaller time frames
- Extended cross-platform-compatibility, results in more flexibility to change to different operating system

• Solaris x86 Support

- Solaris x86 as an ES-Backup Server and Network Client, results in more flexibility to choose operating system

• Backup and Synchronization of additional File Systems

- ZFS, mounted AFP volumes and UDF, results in more flexibility to choose harddisks and more safety
- A new script creates read-only snapshots of ZFS file systems, results in backup of non-changeable data with well-defined file system state - while original data can still be accessed for modification

• Additional Backup Devices

- Support for Fibre Channel devices on Mac OS X, results in more flexibility to choose backup devices

• Updated Administration Application

- ES-Backup JAdmin communicates with server via Unicode, results in correct display of special characters on all operating systems

• HELIOS UB, HELIOS 4th Generation and without HELIOS

- Alltogether in one single binary, results in even more easier product installation

• More Information and Demoverision

- Detailed information on ES-Backup 3.6 and a demoverision is available at www.es-backup.eu

UGSoft since 20 Years - and You will receive two Gifts

• Celebrate with UGSoft

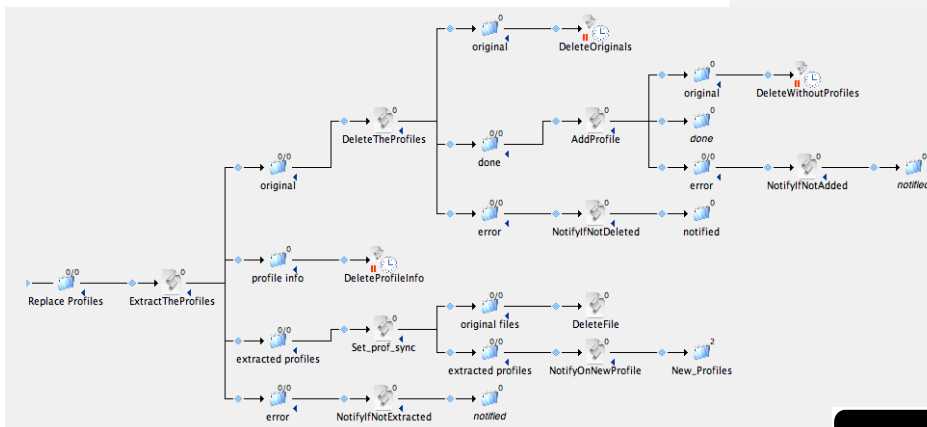

- Visit us at www.ugsoft.de until March 31st, 2007, register as a visitor and take home with you, free-of-charge:

FileTools Package and ScriptingTools Package

- 20 individual script-components for use with *FlowView Pro* and *HELIOS ImageServer* (worth more than 700 Euro)
- Combine these components, e.g. with *scripts from other vendors*, to create complex, self-running workflows with *additional functionalities*, such as setting file permissions, owner and label, notifying users on special events - e.g. if user interaction is required, copying and deleting files, deleting layout files, inspecting HELIOS volumes, etc.

FlowView Pro Trial

- Powerfull tool to build, modify and inspect your workflows graphically on the HELIOS server.
- After four months you can use the free-of-charge 'FlowView Pro for free', purchase a FlowView Pro full product, or change your workflows and script configurations with HELIOS tools - just as you prefer.
